

VOTE YES ON 10 The Animal Cruelty Amendment

Stop animal cruelty by voting to ban inhumane & unnecessary gestation crates used on industrialized pig farms.

√ **Cruelty to animals is morally wrong whether you're talking about pets or farm animals.** On industrial hog factories, pigs are commonly kept in gestation crates - two-foot by seven-foot metal cages that don't even allow the animals to turn around. Unable to exercise or move - and spending up to three years in the gestation crate - the pigs suffer severe physical and psychological ailments. The measure bans only gestation crates, not farrowing crates, as opponents have falsely claimed Humane Societies across Florida and The Humane Society of the United States back Amendment 10.

√ **Corporate hog factories pollute the environment.** Hog factories produce massive amounts of animal waste, polluting water and putrefying the air. If voters approve Amendment 10, we'll prevent mega hog factories from wreaking environmental havoc in Florida. The Florida Sierra Club has endorsed Amendment 10.

√ **Many pig farmers treat animals well and do not use gestation crates.** Small farmers traditionally allow hogs to move around and to graze on pasture. This measure targets large factory farms that are displacing small family farms.

**PLEASE VOTE "YES" ON
AMENDMENT 10
ON NOVEMBER 5!**
